## **CAREER OBJECTIVE**

Armed with a solid foundation in MERN stack, I am seeking a challenging role in an IT company where I can leverage my technical expertise, problem-solving skills, and passion for innovation and development.

## **EDUCATIONAL QUALIFICATION**

- Pursuing BTech (Computer Science & Engineering) at Gandhi Institute For Technology (Autonomous), Bhubaneswar affiliated to Biju Patnaik University of Technology, Rourkela for the academic year 2021-25 with an average CGPA of 8.21.
- Completed Intermediate from Khaira Higher Secondary school, Khaira, Balasore (CHSE), in the academic year 2021 with 72.5%.
- Completed Matriculation from Gadapokhari High School, Gadapokhari, Balasore (BSE) in the academic year 2019 with 73.16%.

## **TECHNICAL SKILLS**

- MS OFFICE (WORD, POWERPOINT)
- Programming Languages: C, JAVA, JavaScript
- Web Development: HTML, CSS, JavaScript, React, Tailwind, Express
- Database: MongoDB
- Tools: Git, GitHub, Postman

## **ACHIEVEMENTS**

- Got 3 stars in Hackerrank and 2 stars in Leetcode.
- Participated in a hackathon organized by Aspire Info Labs in May 2023 in Gandhi Institute For Technology campus where my team and I developed a prototype of a website where you can post a blog feed to the public about your health.

## **INTERNSHIPS AND TRAINING**

### **GLUCIAN INDIA PVT. LTD, BHUBANESWAR**

- During the internship period on front-end web development fundamentals, I immersed myself in HTML, CSS, and the entire web development process.
- I learned how to craft visually appealing, fully functional websites using HTML and CSS.

- I also learned Bootstrap a CSS framework which is used in frontend development.

### **ASPIRE INFO LABS, HYDERABAD**

- Over the internship period, I engaged in an intensive program covering HTML5, CSS3 and JavaScript focusing on web technologies.
- This learning experience helped me to create sophisticated blog pages and professional portfolio websites using HTML and CSS techniques.
- I also learned product testing and make a chart on testing the Zomato login page.

## **PROJECTS UNDERTAKEN**

### **Text Color Brain Game:**

- Created a web game where user has given 30 seconds to choose color of generated random words and after the game end it will show the result.
- There is a screen in which the random words are generated and on that below a container contain 4 buttons to choose the color of the words.
- I used HTML, CSS and JavaScript for develop this project.
- Project link: [https://chandanp01.github.io/color\\_brain\\_game/](https://chandanp01.github.io/color_brain_game/)

### **Weather App:**

- Created a web page where user can search any location and it will be showing the current weather conditions like temperature, humidity, wind speed of that location.
- I used a free weather API to fetch the weather data of the location which is user searched for. This project is developed by HTML, CSS, JavaScript.
- Project link: <https://chandanp01.github.io/weather-app/>

### **Short-URL:**

- Created an application which have an input box, you have to enter any URL, it will be showing the short-URL of the given website.
- I used npm shortid to generate the short URL for the given URL.
- I used Express js framework and mongoDB for this application.
- Build this by learning backend and MVC architecture.

### **Image Search Webpage:**

- Created a web page which have a search-bar, you have to search any image and it will be showing a lot of images related to thar query and also more pages on that query.
- I used a free movie API to fetch the data of the movie. The API send the data in JSON format and I show the data in the UI with the help of CSS. This web page is developed by HTML, CSS, JavaScript.
- Project link: [https://chandanp01.github.io/image\\_search\\_app/](https://chandanp01.github.io/image_search_app/)

## **STRENGTHS**

- Self-Motivated
- Quick Learner
- Adaptability

## HOBBIES

- Traveling
- Listening to music
- Photography

## PERSONAL DETAILS
